Profile

Versatile and highly motivated **Software Developer** with a robust foundation in **web design**, **web development**, **software engineering**, and specialized training in **AI for Software Engineering**. Proven experience designing responsive websites, developing full-stack web applications using **Python (Django)** and **JavaScript**, and integrating AI-powered features using **TensorFlow** and **PyTorch**. Strong problem-solving skills and a passion for building intelligent, scalable solutions that drive innovation and improve user experience.

Professional Experience

Self-Employed | Remote & On-Site, Kenya

JULY 2024 – PRESENT

- Successfully designed, developed, and launched custom software systems, CMS-powered eCommerce websites, and AI-enhanced web applications tailored to diverse client needs across various sectors. Specialized in creating **conversion-focused user experiences**, with strong emphasis on **SEO best practices**, performance optimization, and **scalability**.
- Delivered **end-to-end solutions**—from planning, UI/UX design, and development, to deployment, technical support, and digital strategy.

Education

Information Communication Technology, Kiambu Institute of Science and Technology, Nairobi

SEPTEMBER 2021 – JULY 2024

Web Design & Development, Inceptor Kenya, Nairobi

JUNE 2023 – AUGUST 2023

Learned to design responsive websites and eCommerce platforms using **HTML**, **CSS**, and **JavaScript**. Gained hands-on experience with **WordPress** for building dynamic sites and implemented **SEO best practices** to improve online visibility and ranking.

Full Stack Web Development, Emobilis Technology Institute, Nairobi

OCTOBER 2024 – DECEMBER 2024

Developed full-stack applications using **HTML**, **CSS**, **Bootstrap**, **JavaScript** (frontend), and **Python** with **Django** (backend). Designed user interfaces, created and managed databases with **PostgreSQL**, and built secure, scalable web applications using **REST APIs**.

Implemented **M-Pesa integration** for payment processing in Django-based systems, including **STK Push**, **C2B**, and transaction validation for real-world projects.

Software Engineering (with Specialization in AI for Software Development), Power Learn Project, Nairobi

FEBRUARY 2025 – JULY 2025

Gained a strong foundation in software development, including object-oriented programming, software design patterns, version control (**Git**), system architecture, and agile development.

Built and deployed full-stack applications using **Python**, **Django**, and relational databases like **PostgreSQL**.

AI Specialization: Focused on integrating artificial intelligence into modern software systems.

- Learned and applied **machine learning**, **neural networks**, and **natural language processing (NLP)**.
- Gained hands-on experience with **TensorFlow** and **PyTorch** to build and deploy AI models.
- Developed intelligent features to **automate development tasks**, **optimize workflows**, and **enhance software decision-making**.
- Built and integrated **AI-powered chatbots** for customer support and task automation using **NLP models**.
